

Welcome to the BioResource and Agricultural Engineering Department

Dear BioResource and Agricultural Engineering Student,

On behalf of the department's faculty and students I want to welcome to the BRAE department. I sincerely hope you will take advantage of the opportunities that await you as you further your education and prepare for a career while at Cal Poly.

We have a rich tradition of “Learn by Doing” in the department through our “hands-on” technology-based program. Our goal for you is to gain the knowledge, skills, and experiences necessary for you to be “industry-ready” when you graduate.

To prepare you for this journey I invite you to attend our SOAR Program to be held at Cal Poly this summer. Advising resources to help you prepare for our meeting are located at <http://www.brae.calpoly.edu/policiesandforms.html> . Your schedule will be prepared for you by the University and more information regarding your fall schedule of courses will be made available to you upon your visit to campus.

If you are unable to attend the SOAR Program please review the advising resources on the web at <http://www.brae.calpoly.edu/policiesandforms.html> and the PASS information available on the Cal Poly web portal. With these web resources, you will have the information necessary to understand the University registration process for future quarters as your fall quarter courses will be block scheduled for you. You will be able to view these first in your portal when they become available.

Please feel free to call or write if you have any questions.

Sincerely,

Richard A. Cavaletto, Ph.D., P.E.
Professor & Head
BioResource and Agricultural Engineering Dept.
